PROJECTS

Fake Product Identification System using Blockchain in E-commerce

- Built a blockchain-based system to verify product authenticity.
- Ensured secure and tamper-proof product verification.

Automated Task Reminder and Tracking System

- Worked on task creation, scheduling, reminders, and workflow tracking.
- Built using Spring Boot during Infosys Springboard internship.

Deep Learning-Based PPE Detection System with Cloud Integration

- Developed a PPE detection system for worker safety using AI and Deep Learning.
- Integrated cloud services for real-time monitoring and safety alerts.

BlockCred: Blockchain-Based Digital Identity Platform for Gig Workers

- Built a blockchain-based digital identity platform for gig workers.
- Enabled secure and tamper-proof credential verification using decentralization.

PUBLICATION

“AI-Assisted Adaptive Encryption for Secure Data Protection Using Honey Encryption and Post-Quantum Methods”, *Proceedings of the 2nd IEEE International Conference on Women in Computing (INCOWOCO 2025)*, Pune, India, November 2025.

ACHIEVEMENTS

- Achieved Google Cloud Skills Boost Diamond League (34,000+ points).
- Earned 35+ Google Cloud Skill Badges.
- Completed 50+ courses, 25+ labs, and 5 learning paths.
