PROFILE INFO

Final-year B.E. Computer and Communication Engineering student | CGPA: 8.22 Skills: Java · Python · C · Angular · HTML5 · CSS3 · JavaScript · API Integration · Agile/Scrum · Certified Angular Web Developer (Infosys) & Java Programming (NPTEL) — analytical, quick learner, team collaborator ready to grow as Associate Software Engineer at Infinite Computer Solutions.

PROJECT

○ VolunteerBridge – NGO Volunteer Connection Platform | Infosys Springboard Internship

- Built a full-stack web application using Angular, HTML5, CSS3, JavaScript with component-based architecture and modular design.
- Implemented role-based authentication, dynamic dashboards, and API integration for data-driven volunteer management.
- Delivered production-ready application following Agile/Scrum – sprint planning, iterative development, and demo-based testing.

○ Attendance Management System

- Built a web application using Angular, HTML5, CSS3, and JavaScript to track student attendance with role-based login for Admin, Student, and Teacher.
- Implemented role-based authentication, dynamic dashboards, and API integration for data-driven volunteer management.
- Applied Agile/Scrum practices – iterative development, sprint-based delivery, and modular design for scalable performance.

INTERNSHIPS

○ Infosys Springboard – Angular Full Stack Developer Intern

- Developed a Full Stack web application using Angular, JavaScript, HTML, and CSS with API integration and reusable component architecture.
- Implemented Role-Based Access Control (RBAC), Agile SDLC practices, and role-specific dashboards for secure user management.
